## Integral operators mapping into $H^\infty$

José Ángel Peláez<sup>1</sup>,

We address the problem of studying the boundedness, compactness and weak compactness of the integral operators  $T_g(f)(z) = \int_0^z f(\zeta)g'(\zeta) d\zeta$  acting from a Banach space  $X$  into  $H^\infty$ . We obtain a collection of general results which are appropriately applied and mixed with specific techniques in order to solve the posed questions to particular choices of  $X$ .

Joint work with Manuel D. Contreras, Christian Pommerenke and Jouni Rättyä.
